COURSE OBJECTIVES

- To build software development skills using java programming for real-world applications.
- To understand and apply the concepts of classes, packages, interfaces, arraylist, exceptionhandling and file processing.
- To develop applications using generic programming and event handling.

LIST OF EXPERIMENTS:

1. Develop a Java application to generate Electricity bill. Create a class with the followingmembers: Consumer no., consumer name, previous month reading, current month reading, typeof EB connection(i.e domestic or commercial). Compute the bill amount using the following tariff. If the type of the EB connection is domestic, calculate the amount to be paid as follows:
 - First 100 units - Rs. 1 per unit
 - 101-200 units - Rs. 2.50 per unit
 - 201 -500 units - Rs. 4 per unit
 - > 501 units - Rs. 6 per unitIf the type of the EB connection is commercial, calculate the amount to be paid as follows:
 - First 100 units - Rs. 2 per unit
 - 101-200 units - Rs. 4.50 per unit
 - 201 -500 units - Rs. 6 per unit
 - > 501 units - Rs. 7 per unit
2. Develop a java application to implement currency converter (Dollar to INR, EURO to INR, Yen to INR and vice versa), distance converter (meter to KM, miles to KM and vice versa) , time converter (hours to minutes, seconds and vice versa) using packages.
3. Develop a java application with Employee class with Emp_name, Emp_id, Address, Mail_id, Mobile_no as members. Inherit the classes, Programmer, Assistant Professor, Associate Professor and Professor from employee class. Add Basic Pay (BP) as the member of all the inherited classes with 97% of BP as DA, 10 % of BP as HRA, 12% of BP as PF, 0.1% of BP for staff club fund. Generate pay slips for the employees with their gross and net salary.
4. Design a Java interface for ADT Stack. Implement this interface using array. Provide necessaryexception handling in both the implementations.
5. Write a program to perform string operations using ArrayList.

- Write functions for the following
- Append - add at end
 - Insert – add at particular index
 - Search
 - List all string starts with given letter
- Write a Java Program to create an abstract class named Shape that contains two integers and an empty method named print Area(). Provide three classes named Rectangle, Triangle and Circle such that each one of the classes extends the class Shape. Each one of the classes contains only the method print Area () that prints the area of the given shape.
 - Write a Java program to implement user defined exception handling.
 - Write a Java program that reads a file name from the user, displays information about whether the file exists, whether the file is readable, or writable, the type of file and the length of the file in bytes.
 - Write a java program that implements a multi-threaded application that has three threads. First thread generates a random integer every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of cube of the number.
 - Write a java program to find the maximum value from the given type of elements using a generic function.
 - Design a calculator using event-driven programming paradigm of Java with the following options.
 - Decimal manipulations
 - Scientific manipulations
 - Develop a mini project for any application using Java concepts.

Respected sir,

I am B.Priya, working as a HOD/department of EEE in Sriharathi Engineering college for women, pudukkottai, Tamilnadu.

I am seeking approval for EEE(27 students) and ECE (27 students) students to takepart in an industrial visit to your solar power plant on April 22, 2022 for half a day. As you may be aware, students from our college have made regular field trips to the factory over the past 10 years, and faculties and parents agree that witnessing manufacturing up close is a valuable experience for the students. 4 faculty members will also be present to manage the students.

We are thankful for your response and look forward to your reply as early as possible.

The focal point of this visit was the solar power plant that has been set up at the stadium. It consists of numerous solar panels spread across the stadium's roof. The students learned about the power generation process from absorbing sunlight through panels to converting this energy into usable electricity. It is the first cricket stadium in the world to use solar panels to generate a bulk of the electricity needed to run the stadium.
